## CONTROL TECHNIQUES LAUNCHES SI-INTERBUS MODULES

Control Techniques, part of the Nidec group, has announced the release of new option modules for its Unidrive M, CommanderC and Digitax HD AC and Servo drive platforms.

SI-Interbus modules have been designed for easy integration of Control Techniques' drives in applications that use Interbus fieldbus. The new modules include the ability to use up to 63 nodes on a network, and are available in two formats that support data rates of 500 kBd or 2 MBd.

A Remote Bus Out adapter is also available for easy retrofit of existing Control Techniques' drive installations that incorporate the previous generation SM-Interbus option module.

### About Control Techniques

Control Techniques, a Nidec Motor Corporation business, is a world leader in the design and production of electronic variable speed drives for the control of electric motors. Founded in 1973, the company has its America headquarters in Minneapolis, MN, USA and global headquarters in Newtown, Wales, UK. It has dedicated production and R&D sites globally, along with Automation Centers in 45 locations around the world.

Parent company Nidec Corporation is the world's #1 comprehensive motor manufacturer. The Nidec Group specializes and handles motor application products based on "everything that spins and moves", centering around a motor business that comprises an expansive product line from small precision to supersized motors.
