KBDA
Digital AC Drive with CSP™*

Rugged Die-Cast Aluminum NEMA 4X / IP65 Enclosure with Hinged Cover
Washdown and Watertight for Indoor and Outdoor Use

Primary Features
Horsepower 1/8 to 5 HP, Programmable
115/230/460 VAC - 1ph & 3ph Input
Output 230/460 VAC - 3ph for AC Induction Motors
Starting Torque 200%
Digital Display with LED Status Indicators
FDA Approved Finish**

GFCI Compatible
Allows equipment to operate with Ground Fault Circuit Interruption circuit breakers or outlets.

Benefits
Saves Time
Easy to Install and Simple to Operate. Does not require commissioning.
With CSP™ you are up and running in less than 10 minutes.

Motors Last Longer
Proprietary CL Software
Provides overload protection, prevents motor burnout and eliminates nuisance tripping. UL approved as electronic overload protector for motors.

Energy Saving
Uses only the power the application requires. Replacing constant speed with variable speed will significantly reduce energy costs.

Customization for OEM’s
When an off the shelf drive does not meet your needs, KB will work with you to provide a custom drive solution, Ready to Use, “Out-of-the-Box.”
Customization includes: Pre-calibrating or programming of a stock control, adding a custom label or branding, custom software, PLC functions or designing a new control.

*CSP™ = Common Sense Programming. Parameters are organized into easy-to-understand intuitive groups.
**White cases only
Additional Features

**Sensorless Flux Vector Control**
Flux Vector Compensation with Static Auto-Tune provides excellent speed regulation with high torque loads throughout the entire speed range. Auto energy saving at light loads. Smooth motor torque.

**Electronic Inrush Current Limit (EICL™) Protection**
Eliminates harmful inrush AC line current during power up.

**Multi-Function Output Relay**
Can be used to turn equipment on or off, to signal a warning if the drive is put into “Stop” mode, or to signal if a fault has occurred.

**Jog-Local/Remote**
Set the drive to Jog Mode or changes between Local (Keypad) or Remote Operation.

**Built-in Potentiometer**
Quickest way to change motor speed.

**Ride-Through**
Provides smooth recovery to the previous set speed during a momentary power loss.

**Holding Torque at Zero Speed**
Resists motor shaft rotation when the drive is in “Stop” mode.

**Regeneration Protection**
Eliminates tripping due to high bus voltage caused by rapid deceleration of high inertial loads.

**Undervoltage and Overvoltage Protection**
Shuts down the drive if the AC line input voltage goes above or below the operating range.

**Short Circuit Protection**
Shuts down the drive if a short circuit occurs at the motor (phase-to-phase).

**Drive Options**

*IODA Input/Output Multi-Function Board*
Adds up to 17 points of additional I/O.

**Modbus Serial Communication Module**
See instruction manual for complete description.

**Drive-Link™ Programming Kit**
Allows PC programming.

**On/Off AC Line Switch**
Disconnects the AC line.

**Class “A” (CE) RFI Filter**
Installs inside the drive.

**Liquidtight Fittings**
Provides a liquid-tight seal for wiring the drive. Kit includes necessary liquidtight fittings.

General Connection Diagram

- Drive is set for Reverse Direction.
- Drive is set for Forward Direction.
- Drive is in Overload.
- Drive is in Jog Operation or Remote Signal Operation.
- Up Key: Increases Output Frequency, Set Frequency, Function Number Value, and Code Setting.
- Starts or Stops the drive.
- Changes motor direction.
- Down Key: Decreases Output Frequency, Set Frequency, Function Number Value, and Code Setting.
- Potentiometer: Sets Drive Output Frequency.
- 4-Digit Display
- Drive is in Stop Mode.
- Indicates JOG-LCL/REM Key is set for Local/Remote Signal Operation.
- Drive is in Program Mode.
- Drive Frequency displayed.
- Left Shift / Reset Key: Moves the changeable digit or Resets the drive after a fault has cleared.
- Displays or enters a Function Value or Code Setting.
- Used to enter the Program Mode or Display Mode.
- Sets the drive to Jog Mode or changes between Local (Keypad) or Remote Signal Operation.
