KATO™ GENERATORS

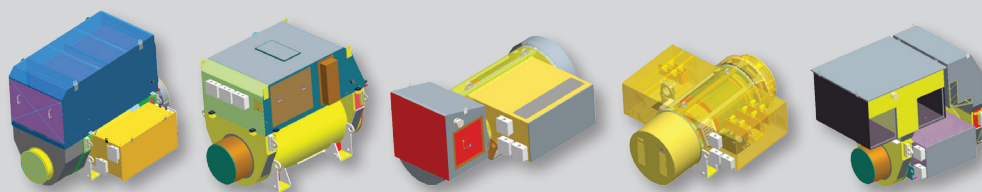

Nidec
All for dreams

KATO ENGINEERING™
LEROY-SOMER™

Advanced design software and an experienced engineering staff ensure our generators are designed with quality and reliability in mind.

Kato Engineering prides itself on reliable and innovative solutions you can count on for your power generation needs. Starting with the specification stage, Kato will work with you to design a generator to match up with your engine or turbine while also taking your entire project into consideration, whether it is for you or your customer. We will examine all the variables that a reliable power system demands, such as power requirements, duty cycles, environment and paralleling needs.

One base generator, five different customer solutions

STANDARDS & CERTIFICATIONS

- NEMA/IEEE
- IECEx/ATEX
- IEC
- Class1 div2
- Marine Agencies
- API 546
- CSA
- GOST-R
- ISO 9001

APPLICATIONS

- Motor-Generator
- Locomotive Traction
- Truck Traction
- Turbine
- Defense
- Oil & Gas

ENGINES

- Diesel
- Gaseous
- Natural Gas
