CORRECTIONAL INSTITUTIONS

Nidec makes it easy to find the right, energy-efficient U.S. MOTORS® brand replacement motor.

Correctional facilities have unique needs because of their 24-hour occupancy levels. Electric motors in these facilities drive everything from security and cell doors to HVAC systems. Energy efficiency is key in this environment. Replacing old motors with high-efficiency motors can reduce a facility's energy use and carbon footprint.

Nidec offers a full line of fractional and integral U.S. MOTORS® brand motors to keep your institution running smoothly and without downtime. Our line spans every system in your facility from hydraulic elevators, water support and supply systems to HVAC motors for indoor air quality and comfort.

Looking for a direct replacement fractional or integral motor? Look no further. The U.S. MOTORS line offers an extensive portfolio of replacements and we have the tools—both eBusiness, and motor specifications and technical data, to connect you with the right motor quickly at www.usmotors.com/OnLine-Catalog.aspx:

- Competitive cross reference tools
 - More than 50,000 cross references by competitor or OEM catalog and model numbers.
- eCatalog search tool (search by ID, features or applications)
- Online chat
