Quantum II DC Drives	Revision Level: A Date: 10/19/2015

PRODUCT OVERVIEW	
<p>The Quantum II series was a microprocessor based DC variable speed motor control introduced by Control Techniques in 1992. It had an output range of 5 to 400 HP. The drive came in regenerative and non-regenerative configurations. It accepted a 3-phase input of 208, 240, 380, 415, or 480 V.</p>	 <p>Quantum II DC Drives</p>

CURRENT LIFECYCLE STATUS	
<p>The current status of the Quantum II DC drives is "Maintenance". Control Techniques currently provides limited repair services for the Quantum II drives and some of the options</p>	

PENDING LIFECYCLE STATUS CHANGES	
<p>The Quantum II product status will change to "Obsolete". At this time products will need to be replaced and repairs will no longer be available.</p>	

REPLACEMENT PRODUCT	
<p>The Quantum MP replaces the Quantum II quite easily for almost all applications up to 400 HP. The Quantum MP offers much more application flexibility and fieldbus interconnectivity. Drive software tools are complimentary and are available on our website for download.</p> <p>For full details of the Quantum MP product range or if you need assistance with product selection and conversion please visit the DC Drives page on the Control Techniques website.</p> <p>Please visit our Upgrade Assistance page for product upgrade assistance and contact information.</p>	 <p>Quantum MP DC Drives</p>
