Commander SK

Commander C200

Differences to Note:

- Commander C200 requires a AI-485-ADAPTOR for Modbus RTU communications, order separately.
- The Commander SK when fitted with an SM-I/O option could support 2 or more analog outputs. The Commander C200 is limited to 1 analog output. For applications requiring 2 analog outputs the Unidrive M400 is the recommended replacement.
