<b>DC400 DC Drives</b>	Revision Level: A Date: 10/19/2015

## PRODUCT OVERVIEW

The DC400 were DC drives marketed by Safronics. These drives would cover applications from 25-1000 A. The DC400 was often part of a RetroPak (drive mounted on a panel with input fusing, input contactor, blower motor starter, etc.) or StandardPak (drive mounted in an enclosure with various options).

## CURRENT LIFECYCLE STATUS

The current status of the DC400 DC drives is "Obsolete". Control Techniques no longer provides repair services or replacement part support. Production capability of DC400 drives no longer exist. Upgrade assistance to current product is available.

## PENDING LIFECYCLE STATUS CHANGES

None.

## REPLACEMENT PRODUCT

We generally replace the DC400 functionality with either our Mentor MP or Quantum MP Digital DC Drive or with our DC StandardPak (Mentor MP on a panel). Our Mentor MP or Quantum MP drives can be setup using your Laptop or PC. Software for these drives is complimentary!

For full details of the Quantum MP and Mentor MP product range or if you need assistance with product selection and conversion please visit the DC Drives page on the Control Techniques website.

Please visit our Upgrade Assistance page for product upgrade assistance and contact information.
