dcM6+ DC Drives	

PRODUCT OVERVIEW

The dcM6+ and dcM12+ were DC drives marketed by Safronics. The non-regen dcM6+ and regen dcM12+ models were available for 5-800 HP applications and were supported by SAFlink programming software that was purchased separately.

CURRENT LIFECYCLE STATUS

The current status of the dcM6+ DC drives is "Obsolete". Control Techniques no longer provides repair services or replacement part support. Production capability of dcM6+ drives no longer exist. Upgrade assistance to current product is available.

PENDING LIFECYCLE STATUS CHANGES

None.

REPLACEMENT PRODUCT

The **Quantum MP** or **Mentor MP** replaces the dcM6+ quite easily for almost all applications. The Quantum MP and Mentor MP offer much more application flexibility and fieldbus interconnectivity. Drive software tools are complimentary and are available on our website for download.

For full details of the Quantum MP and Mentor MP product range or if you need assistance with product selection and conversion please visit the DC Drives page on the Control Techniques website.

Please visit our Upgrade Assistance page for product upgrade assistance and contact information.
