

Capacitive Switches

General Specifications

All capacitive switches are close-tolerance, near field projected capacitive electrical switches with thin-gauge plastic or glass graphic first-surface layers. Functioning very similar to today's popular projective capacitive touchscreens, they work by detecting the electrical change from a human finger or other conductive object. And like our popular membrane assemblies, graphic overlays, and advanced user interface solutions supplied by Valmark Interface Solutions, and because every part VIS provides is application specific, each of the characteristics below can be, to greater or lesser extent, customized to a particular application and use-model. The following is a set of typical capacitive switch specifications that VIS can provide:

Mechanical

Characteristics	Typical Values	Test Methods
1. Life - Operations:	1 to 35 millions	IAW ASTM F1578
2. Actuation Force:	0.0 oz. non-contract	IAW ASTM F1597
3. Travel:	0.000"	Non travel, contact required only
4. Bend:	1.0"R, 10-20 cycles	IAW ASTM F1683 - for tail connector only
5. Crease:	1 to 5 cycles	IAW ASTM F1683 - for tail connector only

Electrical

Characteristics	Typical Values	Test Methods
1. Close Loop Resistance:	$\leq 100\Omega$	Function of controller
2. Open Loop Resistance:	$>10M\Omega$	IAW ASTM F1680
3. Insulation Resistance:	$>10M\Omega$	IAW ASTM F1689
4. Dielectric Resistance:	250VDC – 1k VDC	N/A
5. Contact Bounce:	$\leq 10ms$	Software dependent, typ.
6. Volume Resistivity:	$>10^{15} \Omega\cdot m$	IAW ASTM D257 (higher for glass cover)
7. Dielectric Constant:	2.9	IAW ASTM D150 (higher for glass cover)

Environmental

Characteristics	Typical Values	Test Methods
1. Temperature – Operational: Temperature – Storage:	-20 °C to +65 °C -40 °C to +85 °C"	IAW ASTM F1596 Level 4 IAW ASTM F1596 Level 1
2. Humidity:	0 – 95% RH (NC)	IAW ASTM F1596 Level 4
3. Travel:	50 (g for 11ms)	IAW MIL-STD 810E Method 516.4
4. Vibration:	10 (g 10 to 2 kHz)	IAW ASTM F2188
5. Altitude:	0 to 40,000 ft.	IAW ASTM F1762, no effect.

VIS (Valmark Interface Solutions™) is the industry leader in engineering, manufacturing and testing of human machine interface (HMI) products. These products include membrane switches, touch screens/sensors, key panel assemblies, graphic overlays, EL lamps, EMI/RFI shielding and printed compliance labeling. For over forty years, high-tech leaders like Apple Computer, Agilent Technologies, Fresenius, Sun Microsystems, and Abbott Laboratories have trusted VIS quality, on-time delivery, and technical innovation to support cutting-edge products in the most competitive markets. Electronic, medical, automotive, and office technology control panels depend on sophisticated membrane switch, touch screens/sensor, elastomer touch, and PCB assemblies. With multi-platform CAD/CAM systems, unique ink, dielectric, shielding, silver coating, and encapsulating technologies, VIS works with each customer to develop their optimal solution.

Note: Valmark Industries, Inc. has no control over the use to which others may put these materials and assemblies, and does not guarantee that the same results as those described herein will be obtained. Nor does Valmark Industries, Inc. guarantee the effectiveness or safety of any possible or suggested design for articles of manufacture as illustrated herein by any photos, technical drawings and the like. Products or design or both should make his own tests to determine the suitability of the materials, finished products, or any materials for the design, as well as the suitability of the materials, products and/or design for his own particular application.
