

Subject: Important Nidec Automation Trade Update

Dear Valued Customer,

The US government is discussing tariffs on products imported from Mexico and Canada, and additional tariffs on imports from China. A large majority of Nidec Automation products could be impacted by these tariffs. As we realize the effects of tariffs, Nidec Automation will be adding a separate invoice line-item for each item affected at the tariff rate on the day of import. In the event there are changes or new tariffs stated here or otherwise, Nidec will make the required adjustments to the tariff charges invoiced.

Tariff charges can be disruptive, and we appreciate your cooperation as we navigate these new trade policies. Our team is committed to keeping you informed and minimizing the impact on your business wherever possible.

If you have any questions regarding this update or would like to discuss how these changes may affect your orders, please reach out to your Nidec Automation account manager.

Thank you for your continued partnership.

Best regards,

Patrick Delaney
VP Sales
Nidec Automation
