

Committed to the Gate & Door Industry by Offering Custom Motor Solutions

A major door operator OEM needed a new motor that would meet demands of a high cycle commercial lift door. In this demanding application, a motor designed by our dedicated Application Engineering team was produced to meet our customer's specific requirements.

Why U.S.?

Because commercial gates and doors play a critical role in access control, you want an experienced motor partner that puts safety and security first while also delivering cost-effective reliability. You can trust U.S. MOTORS® brand commercial gate and door motors from Nidec Motor Corporation to help provide the lifting power you need. At Nidec Motor Corporation, we believe in collaborating with our customers, engineers, and design groups to create an energy-efficient and reliable solution that meets or exceeds proper specifications. Like other major OEMs, rely on our motors to help your commercial lift doors, residential gates, and commercial gates operate efficiently.

Whether you need a motor that can slide or swing open a gate at a property entrance or raise and lower your lift door to access your facility, we have a safe and reliable solution that can handle your day-to-day demands. Our motors dependably power multiple commercial garage door openers, including jackshaft (wall-mount) and trolley commercial openers.

No matter the need, doors open with Nidec.
