USWK Digital AC Drive with CSP*
for 3-Phase AC Induction Motors

(Factory Programmable for PMAC Motors)
NEMA1/IP 20 Enclosure

- Horsepower 1/8 to 1/2 HP**
- One Model for 115 and 230 VAC-1ph Input - 50/60 Hz
- Output 230 VAC-3ph
- 200% starting torque
- Ultra bright digital display with LED status indicators
- Front panel power On/Off switch

Benefits

GFCI Compatible
- Contains proprietary software which prevents GFCI circuit breakers and outlets from tripping***

Saves Time
- Easy to install and simple to operate
- Does not require commissioning
- With CSP* you are up and running in less than 10 minutes.

Motors Last Longer
- Proprietary current limit software: Provides overload protection, prevents motor burnout and eliminates nuisance tripping.
  UL approved as electronic overload protector for motors.

Energy Saving
- Uses only the power the application requires.
- Replacing constant speed with variable speed will significantly reduce energy costs.

Customization for OEM’s
- When an off the shelf drive does not meet your needs, we will work with you to provide a custom drive solution, ready to use, out-of-the-box.
- Customization includes: Pre-calibrating or programming of a stock control, adding a custom label or branding, custom software, PLC functions or designing a new control.

*CSP = Common Sense Programming. Parameters are organized into easy-to-understand intuitive groups.
**Lower horsepower models available (USWK-21D, 2P3D, 2P6D).
***Use program function F0.04 to set the drive for GFCI operation (may increase audible motor noise)

Additional Features

Sensorless Flux Vector Control
Flux Vector Compensation with Static Auto-Tune provides excellent speed regulation with high torque loads throughout the entire speed range. Auto energy saving at light loads. Smooth motor torque.

Electronic Inrush Current Limit (EICl™) Protection
Eliminates harmful inrush AC line current during power up.

Jog
Provides a fixed preset speed.

Built-in Potentiometer
Sets motor speed in lieu of keypad.

Ride-Through
Provides smooth recovery to the previous set speed during a momentary power loss.

Holding Torque at Zero Speed
Resists motor shaft rotation when the drive is in “Stop” mode.

Regeneration Protection
Eliminates tripping due to high bus voltage caused by rapid deceleration of high inertial loads.

Undervoltage and Overvoltage Protection
Shuts down the drive if the AC line input voltage goes above or below the operating range.

Short Circuit Protection
Shuts down the drive if a short circuit occurs at the motor (phase-to-phase).

Drive Input Storage Settings

Drive Set for 208/230 Volt AC Line Input (J3 Not Installed) (Factory Setting)

Drive Set for 115 Volt AC Line Input (J3 Installed)
Applications

- Actuators
- Air Cleaners
- Amusement Rides
- Ball Pitching Machines
- Blowers
- Boat Lifts
- Bowling Alley Lane Cleaners
- CNC
- Conveyors
- Door and Gate Openers
- Drilling
- Duct Cleaners
- Dumbwaiters
- Elevators and Hoists
- Exercise Equipment
- Fabric Processing
- Fans
- Feeders
- Film Processing
- Floor Cleaning
- Food Processing
- Garment Cutting
- HVAC
- Indexers
- Irrigation
- Laminating
- Lift Station Pumps
- Machine Tools
- Medical
- Milling
- Mixers
- Oven Conveyors
- Packaging
- Paint Blenders, Shakers, and Sprayers
- Paper Handling
- Portable Equipment Used with GFCIs
- Pottery Wheels
- Printing
- Pumps
- Range Hoods
- Sandblasting
- Saws
- Sewing
- Stretch Wrap
- Textile
- Treadmills
- Therapeutic Vibrators
- Washing Machines
- Wave Soldering
- Web Processing
- Wheelchair Lifts
- Whole House Vacuums and Attic Fans
- Wire Feeders
- Wood and Metal Lathes and Cutters
- Winders and Unwinders

Ratings

115/230 VAC 1-Phase Input • 230 VAC 3-Phase Output

Note: 1) Rated 2.2 Amps on 115 VAC input.

Specifications

- Maximum Load (% of Current Overload for 2 Minutes): 150
- Switching Frequency (kHz): 8, 12, 16
- Output Frequency Resolution (Hz): 0.06
- Minimum Output Frequency to Motor (Hz): 1
- Acceleration Time (Seconds): 0.1 – 180
- Deceleration Time (Seconds): 0.3 – 180
- Speed Range (Ratio): 60:1
- Speed Regulation (30:1 Speed Range, 0 – Full Load) (% Base Speed): 2.5
- Stalled Motor Trip Time (Seconds): 6
- Braking: Regenerative*
- Operating Temperature Range (°C / °F): 0 – 40 / 32 – 104
- Storage Temperature (°C / °F): -25 – +85 / -13 – +185

*DC Injection Braking - Programmable via keypad.

Dimensions – (Inches/mm)
